### **INPUTS**

WEATHER SUMMARY: EXPECT WIND TRANSITIONS, SEE IMET FORECAST, SUNRISE 0655 **SUNSET 1648 DAYLIGHT HOURS 9:53** 

### **OUTPUTS**

### FIRE BEHAVIOR

GENERAL: THE ENERGY RELEASE COMPONENT OF THE NATIONAL FIRE DANGER RATING SYSTEM IS 99 -- TRENDING STRONGLY UPWARD OVER THE NEXT 3 DAYS. LIVE FUELS ARE FAR BELOW CRITICAL LEVELS. LAST RAINFALL IN THE FIRE AREA OVER 0.10" WAS 250 DAYS AGO. PROBABILITY OF IGNITION 90% AT PEAK DAYTIME HEATING.

### SPECIFIC:

### **VENTURA ZONE**

**BRANCH I AND VI** 

NO MOVEMENT ANTICIPATED AN ALONG SR 150.

### **BRANCH II**

FIRE IS ACTIVE IN THE UPPER REACHES OF THE NORDOFF RIDGE AND IN THE MATILIJA WILDERNESS IN AREAS OUTSIDE THE DAY FIRE BURN FOOTPRINT. THERE IS SOME ROLLOUT AND THE FIRE IS CREEPING DOWN SLOPE. ONCE AT THE BASE OF ANY SLOPE THE FIRE WILL RUN WITH THE TERRAIN. FIRE IN SESPE ABOVE FILLMORE CONTINUES TO BACK IN PINE CANYON.

**BRANCH III AND IV** 

NO MOVEMENT ANTICIPATED

### **SANTA BARBARA ZONE**

**BRANCH XX AND XXI** 

EXPECT DOWNHILL RUNS INTO POPULATED AREAS IN THE LATE AFTERNOON AND OVERNIGHT FROM 1500-0900 AND 0400-0700 WESTWARD PROGRESS WILL CONTINUE DURING THE DAY ON THE SANTA YNEZ RANGE.

### **BRANCH X**

FIRE ADVANCING AGAINST THE WIND IN THE AGUA CALIENTE CANYON AND DIABLO CANYON. SPOTTING AND UPSLOPE RUNS WILL CONTINUE NORTHWARD PROGRESS.

### **AIR OPERATIONS:**

HEAVY SMOKE AND TURBULENCE DOWNWIND OF FIRE ACTIVITY CAN DIMINISH AIR OPERATIONS

### SAFETY

- SAFETY ZONES IN HEAVY BRUSH NEED TO BE BIGGER THAN THE 4X FLAME HEIGHT RECOMMENDED IN THE IRPG. CONSIDER 32X THE HEIGHT OF THE VEGETATION IF WINDS ARE OVER 15 MPH AND SLOPES ARE OVER 30% AS RECOMMENDED BY BUTLER.
- POST A WEATHER WATCH FOR CHANGES IN RH INDICATING A CHANGE IN THE AIR MASS AND WIND DIRECTION.
- TRAVEL TIME TO SAFE ZONES NEED TO BE MANAGED AS INDIRECT LINE IS CONSTRUCTED.

### HYGIENE

A lot of personnel in close proximity

### **Watch Out**

- Multiple reports of people with gastrointestinal issues
- Working for days in close proximity in your engines and crew buggies
- Many people observed not using hand wash stations after using bathrooms

### **Mitigation**

- If you have symptoms, keep 3-5 away from others when possible,
- · Cover your mouth when coughing and or sneezing
- Use the hand wash stations provided

### **RESPECT the POTENTIAL**

**Fuels Weather and Topography** 

### **Watch Out**

- The energy components are at record levels
- RH single digits, Battling Winds with instant 180 degree swings in direction
- ROS....Creeping along to Sheeting across Brush with100'+ flame lengths

### Mitigation

- Take weather often and notify your personnel
- Base your plan on the most severe potentials
- Escape Routes, TRA's, Safety Zones

### COMPLACENCY

Personnel are getting into an efficient Groove, This is BAD

### Watch Out

- Mind is not focused on the mission
- Bored doing the same thing day after day.....Routine
- Getting Lazy with PPE

### **Mitigation**

- Keep your personnel engaged by communicating the observed
- Review 10's/18's and apply them to the current assignment
- Review local fire and fatality history with your personnel and be the supervisor who doesn't tolerate complacency.

### THOMAS FIRE INFORMATION

Ventura County Fire Information Line: 805-465-6650
Santa Barbara County Fire Information Line: 800-400-1572
Media Line: 805-377-4860

### **MEDIA**

<u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel
  cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

### CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

### PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

### **LOST AND FOUND**

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Santa Rosa Hall. If you have found an item on the incident, bring the item to the Santa Rosa Hall.

### FIRE SUPPRESSION REPAIR PLAN THOMAS FIRE: CA-VNC-103156

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

### Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

### **Inventory and Mapping**

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Branch. **ORANGE** flagging/**ORANGE** spray paint or Green on White Polka-Dot flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the flagging for ease of use.

### **Objectives**

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

### Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

 Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

### Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush if available and nearby to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

### Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

### Sensitive Resource Areas

Equipment shall not go into Sensitive Resource Areas unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Sensitive Resource Areas have been flagged by the resource personnel with Green and White Polka-dot flagging . Sensitive Resource Areas may be delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows: Equipment operators should contact a suppression repair field representative before beginning conducting operations if questions regarding a flagged locations are encountered.

### Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%	) 0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12"berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

### **Conflicts with Suppression Activities**

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

### Water Bar Spacing and Guidelines

Fireline slope	Maximum Distance Apart
<u>%</u>	(feet)
1-6	300
7-9	200
10-14	150
15-20	90
21-40	50
41-60	25

Recommended spacing for waterbars on firelines.
Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"

### TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. We are located in a tent next to the Sheriff's Trailer.
